We take all possible care to send only such stock as will give satisfactory results.

Mr. Henry Sayles, of Abilene, Texas, writes, in part, as follows:

"Summing my whole garden up, the flowers purchased of you are simply gorgeous and afford my entire family very great pleasure. I have been a lover of plants and flowers for more than forty years, and I long since reached the conclusion that the pleasures and delights of a home were more in the outside surroundings than the furnishings within."

Start with the porch and plant a rose, a rose with that intenseness of red in its flowers as is only found in the wonderful Hardy June blooming rose Excelsa. It will yield a thousand per cent more than any other small investment about the home. (See description page 28.)

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS

WE RESPECTFULLY CALL ATTENTION TO THE SUGGESTIONS ON THESE PAGES, WHICH, IF FOLLOWED, WILL AID IN THE PROMPT AND SATISFACTORY EXECUTION OF YOUR ORDERS

The Glory of the Garden

It is a common saying that the love of flowers is universal, and considering that the tendency of the age seems to be to subdivide occupations and interests it is not surprising that many of us should find practically all of our leisure time given to the study and cultivation of flowers. The stress of common life finds much relaxation in the flower garden which affords varied interest, exercise and pleasure the year round, and then we find there much encouragement in the work of one's own hands. Not only does personal work make one's garden seem better and more attractive but out of it develops a keen interest in comparison and competition. It is a happy thought for us all that out of the smallest plot of ground one can raise the finest flowers that can be grown.

Comparative Value of Roses

Don't think any Rose too small to do well. The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. Roses of this size are to be recommended for all Rose growing sections. If you wish the largest and best Roses for quick effect, then Roses of the two-year size from four to five-inch pots are to be recommended.

Advantage of Pot Grown Roses

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

Springfield, Ohio, U. S. A.

is headquarters in the United States for the growing and shipping of plants, and is the greatest Rose producing center in the world. It is centrally located, geographically, with three express companies—American, Adams and Wells Fargo—which connect with all others, and has unequaled facilities for receiving and shipping orders.

Shall We Remove Soil from Roots and Ship Express Prepaid?

Read these Conditions Carefully

If you wish us to ship by Express, Prepaid, with soil removed, you must give us instructions to do so.

Removing the soil, or ball of earth, from the roots of the plants places the shipping of plants on a mail order basis, and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, except, however, on orders for such plants as Cycas, Palms, Ficus, Azaleas, Araucarias, Camellias, Rhododendrons, Banana Plants, large Lemons or other large decorative plants; Dahlias, Caladiums, Peonies, large Shrubs, Nursery Stock, or vegetable seeds in pints and quarts, and garden requisites. Large plants must be shipped without the roots being disturbed if one is to expect the best results from them. The prepay offer does apply, however, on such plants as Roses, Begonias, Chrysanthemums, Carnations, Cannas, and ornamental Ferns, Geraniums, Fuchsias, Lilies, mailing size Shrubs, Hardy Vines, some of the Hardy Perennials and miscellaneous Bedding Plants. These plants can be shipped to the most far away sections of our country with the soil removed, and transplanted safely.

SUGGESTIONS FOR GROWING ROSES

When Plants Are Received When plants are received it is well to give careful attention to the protection of the roots until they are planted. Drying of the roots by winds is fatal. Dipping the roots in a thin slushy mud is an advantage and which thoroughly protects the roots from the air. When setting the plants in the ground see that the soil is firmed about them well and protect the plants from the direct rays of the sun for a couple of days. When own root plants are purchased, with full ball of earth, protection from the sun is not wholly necessary. Water thoroughly after you have made the planting, then cultivate regularly. (See Guide.)

Planting and Soil Roses must be planted in the right place and in the right manner to secure any degree of success. They should never be planted where they will be shaded too much. Under trees is no place for them, nor among shrubbery. The best place is in a well-drained part of the garden where they get the sun during the whole morning and partly in the afternoon. The Rose, as well as all other plants, must have plenty of sun in order to produce flowers, and this fact should never be lost sight of in planting. Naturally damp, soggy ground should never be selected for planting, a well-drained soil being necessary. If the soil is inclined to be poor, the addition of some well-rotted cow or horse manure will be of great benefit. The plants should be set from one to two feet apart. Plants set out with cramped roots never do as well as those having plenty of root room. (See Guide.)

Manure The Rose is a very gross feeder, and will consequently require a liberal supply of manure. The best manure is unquestionably farmyard manure. In light soils cow or pig manure will do. In heavy soil, stable manure, with the addition of cow or pig manure—and, if procurable, some leaf soil—is the best, as this helps to lighten the soil and keep it open. In all cases the manure should be well decomposed, as fresh manure will burn the roots. Bone meal is an excellent fertilizer (see page 36.) (See Guide.)

Pruning The object of pruning Roses is to increase their productive power, and also to help the shapely appearance of the plant. Generally speaking, the work is done in the early spring just before the growing season. All weak and old scraggly growth of years previous should be cut out, and old growth that has bloomed a year or more before. With old-fashioned Roses, such as Harrison's Yellow, etc., which flower on the old wood of previous seasons' growth (similar to the hardy shrubs), the pruning should be done right after the flowering season. (See Guide.)

Watering Should spring and summer prove dry, syringing of the foliage of the plants and watering of the soil regularly is necessary. The ground around all newly planted Roses should be well saturated once a week. Diluted liquid manure can be used when the plants have become well established. (See Guide.)

Insects Insects are divided into two classes. First, the chewing, gnawing and biting insects; and second, sucking insects. Those of the first class eat the foliage or fruits, or gnaw off the stems and flowers of the plant. Whether they are bugs, worms, caterpillars or slugs, they are best destroyed by some poison applied on the surface of

their food plants, as Paris Green or Hellebore. If for any reason it is not deemed safe to use these poisons, Pyrethrum (Persian Insect Powder), which you can purchase at your drug store, or tobacco, in some form should be used. Those insects classed under the sucking insects, such as Scale, Green and Red Spider and Mealy Bugs, must be killed by insecticides, which are either irritants and which produce death by coming in bodily contact with the pest, or substances that close up the breathing pores and produce suffocation. The best one universal insecticide we know of for all kinds of insects is Nicotinic. (See page 36.) The Fungoid Diseases that bother Rose Plants are mildew, which shows itself in a white powdery accumulation on the leaves caused by sudden changes of temperature, by watering just before night, by too little water, by extreme dryness, by poor drainage, or a deficiency in plant food. Sulphur Powder or prepared fungicides, the remedy. Black Spot or Leaf Blight, showing itself in black spots is caused by reasons similar to those bringing about mildew. Picking off all affected leaves and spraying with prepared fungicides the remedy. (See Guide.)

Winter Protection We have indicated the hardiness and blooming season of our Roses in each description as follows: "SUMMER BLOOMING—HARDY WITH PROTECTION," which refers to the Teas and Hybrid Teas, or Monthly Blooming Roses, which will require protection throughout the country excepting in the far Southern states. "HARDY JUNE BLOOMING ROSES," which refers to the Hybrid Perpetual Roses or those which are perfectly hardy and which have the natural June flowering season. "HARDY SUMMER BLOOMING," which covers the class of hardy bedding Roses such as the dwarf bush Ramblers. "HARDY CLIMBING JUNE ROSES," which covers the class of Roses such as the Ramblers, which are perfectly hardy and have the natural June flowering season. It is well, however, to protect all Roses from severe winters. The important point is to keep the ground around the base of the plants dry. The plants should be first covered with rough material of some kind to allow of a circulation of air over the surface of the ground, and this rough covering can be topped with leaves, manure or other coarse material such as will shed the winter storms of rain, sleet and snow. Plants in winter should be kept dry for the same reason that we keep ourselves dry. Remember, there is much more in common, or should be, between animal and plant life than is practically acknowledged by most of those who strive for success in the growing of Roses. One must always remember that both demand for their perfect development a sufficiency of nourishing food and drink, a pure atmosphere, a temperature as equable as possible, careful protection and thorough cleanliness. Let everyone who plants Roses bear this in mind, and we shall find a wonderful improvement in the quality and quantity of the flowers. (See Guide.)

Garden By McGregor's Guide

THE QUEEN OF ALL FLOWERS The Garden Rose

The name is an inspiration to all garden lovers. Roses are justly classed among the showiest and best plants for decorating the home grounds. We endeavor in this catalogue to present the merits of each variety fairly and faithfully, being cautious not to overpraise—preferring to say too little rather than too much. Recognizing the importance of robust, healthy habit, hardiness and freedom of bloom, combined with beauty of flower, we propagate largely varieties possessing these characteristics, and recommend such kinds for general planting; and we also give due attention to those varieties which are less vigorous and robust, and which therefore require more care to bring them to perfection. In the hands of the Rose lover all kinds amply repay any care bestowed upon them. Our immense stock and great variety of Roses enable us to offer assortments adapted to various purposes; and whenever we can be of any assistance in making selections, our services will be cheerfully given.

The Greatest of Them All

(Hardy June blooming, should be protected.) A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant rosy-carmine, shaded towards the center with rich carmine-crimson. The back of the outer petals takes the coloring of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as one's finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its splendid value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name. (See illustration and prices.)

McGregor's Tested Fancy Roses

In this Collection we have grouped together 12 of the finest Garden Roses for summer blooming. They make up a collection of Hybrid Tea Roses, which class is rapidly taking the foremost rank, having been produced by crossing the free flowering Tea Roses with the Hardy June Flowering or Hybrid Perpetual classes. This collection not only combines the free flowering habit of the Tea Rose with the rich and varied colors of the other classes, but also inherits unusual hardiness. The collection shows the wonderful results achieved by the most noted Rose specialists of this country and Europe. Not only does the collection represent all colors known in Roses, but shows many beautiful shades and color combinations not found in the ordinary varieties. We believe the collection to be one of superior merit and especially adapted to our climatic conditions. Each and every variety a perfect gem in its particular color and form.

(3 yr.) **Mrs. Maynard Sinton** (60c)

"The Masterpiece of Perfection in a Rose."

In this grand variety we have the masterpiece of perfection in a Rose, in size the largest, in shape perfect and in form and color the most beautiful. The color is pure pearly-white, sometimes tinged with fawn. Of enormous size, with high pointed center; a model exhibition flower, with petals of great depth and of Ivory-like substance; a stout healthy grower, every shoot being crowned with a flower-bud, and unlike most other very large Roses, every bloom comes perfect; a truly glorious variety, possessing a fragrance unsurpassed among Roses.

(3 yr.) **Hoosier Beauty** (60c)

"Recognized as One of the Great Introductions."

The color is a deep rich velvety crimson. The velvety blooms with huge petals form a revelation in coloring. The flowers are faultless and perfect, large and quite full, beautifully arranged and of wonderful depth and substance. It is a Rose of unusual make-up. The growth is sturdy, uniform and perfect and the blooms which are held rigidly upright are of the most delicate and sweet perfume. It is a continuous bloomer and is a decorative Rose of the highest value and has been recognized as one of the great introductions for garden and cut-flower purposes of recent years.

Roses of Late Introduction

The best bloomers for the yard and garden are included in these newer Roses of all kinds. Those offered are of unusual value. Just as Rose growers in America have come to recognize the essentials that must be present in a novelty, so in Europe these same characteristics are being bred into the seedling, and it is with confidence that we recommend the following magnificent varieties. The number of new varieties of Roses introduced from all parts of the world will average about one hundred per year. After a thorough test, usually from five to ten sorts each year will come up to the mark as being worthy of cultivation. The Roses listed here are not untried, having passed the most severe tests, and are offered as gold medal varieties.

(Summer blooming, hardy with protection.) The fame of the superb yellow Rose Marechal Niel, with its large, deep, golden-yellow flowers, is world-wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. In the North the plant should have careful protection in open ground during the winter. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from Southern California growers tell of single plants showing one to two thousand blooms at a time. As many as four hundred perfect blossoms have been taken from a single plant within a couple of months. All in all it is one grand Rose. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The tea fragrance is strongly present in this Rose. It is a variety which practically stands by itself. BEDDING ROSES THAT STAND WITHOUT A PEER

A Bed of the Improved Baby Rambler Rose, Baby Tausendschoen—Showiest and Prettiest of all the Bush Ramblers.

There is an unusual charm about the Everblooming Baby Rambler and Polyantha type of Roses. There is an unusual daintiness in the flowers and wonderful freedom of bloom, and they also exceed most monthly blooming Roses in their hardiness. They thrive under conditions that might be fatal to many garden Roses. The growth is distinguished by its comparatively low bushy habit; the blossoms coming in clusters and producing a beautiful mass effect. The Rose is sturdy and vigorous in growth, practically immune to the attacks of insects, and with its marvelous blooming qualities, takes a front rank for bedding purposes.

FOUR WONDERFUL CLIMBING ROSES

ALL HAVE BEEN AWARDED SEVERAL MEDALS BY THE HORTICULTURAL SOCIETY OF NEW YORK

The Wonderful Hardy Climbing Rose

Dr. W. Van Fleet

Hardy Summer Blooming.

Dr. W. Van Fleet stands at the very head of the Climbing Roses. Nothing like it has ever before been produced. Its parents are the lovely sea-shell pink Rose, Souvenir de Pres. Carnot, and the fast-growing climbing or trailing pure white memorial Rose, Rosa Wichuriana. The flowers, when open, run four inches and over in diameter—borne in profusion. The color is a very delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. The flowers are full and double, delicately perfumed. The variety grows vigorously and is immune from mildew and other diseases which often befall roses. Strong one-year plants on own roots, 20c each, postpaid; 3 for 50c; 6 for 90c; 12 for \$1.50, postpaid. Stronger 2-year plants, 50c each; 3 for \$1.25; 6 for \$2.00; 12 for \$3.75.

McGregor Bros. Co.: The Rose plants which I received from you last spring all did fine in spite of the fact that I had not had much previous experience in Rose culture. It certainly was a marvel to see those climbers climb. Please send me a price list of your Roses, as a number of my friends are anxious to know where they can obtain Rose plants like mine.

Miss M. F., Ohio.

The Wonderful Hardy Porch Climbing American Beauty Rose

Hardy June Blooming.

(See Illustration.)

Flowers are single, about three inches in diameter and a light pink in color. This Rose is perfectly hardy, has a fine foliage that does not burn with the sun, and its thick, glossy leaves keep on the bush all summer, which gives it a pleasing appearance. Immense blooms measuring three to four inches in diameter; and each one is invariably produced on a separate stem. The color is glowing crimson-red, the real American Beauty color. The foliage is magnificent and is an important feature in Climbing Roses, for without healthy, leathery foliage any climbing rose is a failure, because it is unsightly. This beautiful Rose is absolutely hardy in all localities. Price, nice strong one-year-old plants, 20c each; 3 for 50c, postpaid; two-year-old plants, 50c each; 3 for \$1.30.

McGregor Bros. Co.: The Climbing American Beauty is growing at my own home, "Breeze Hill," and was put just where you see it in the picture. It grew like all possessed. All the growth you see and a good bit more that you do not see has happened since, and this Rose was some sight last June.

The Most Graceful, Free-Flowering and Vigorous Climbing Rose

"The flowers are produced in clusters—thousands of them on a single plant."

(Hardy June Blooming.) A beautiful shell-pink Rose, of sweetest fragrance, useful for many purposes, and giving wonderful satisfaction. Even when the flowers commence to fade the color is still pleasing, being then a lovely deep rose.

The color is a fine dark crimson, shaded deep vermillion-crimson on the edges, frequently overlaid with a rich velvety shading, the whole flower resembling that beautiful color seen in Duchess of Bedford. It is a strong, vigorous grower, carrying its flowers upright; the blooms are full, of great size, having wonderful substance and depth of petal, with high pointed center of the Ideal Exhibition type. When seen at its best this is a noble flower, and is also one of the sweetest perfumed Roses in cultivation. There should be a few of these Roses in every garden. Highly recommended by all who know it. 20c each; 3 for 50c; two-year, 40c each; 3 for \$1.10.

Special Offer The Five Nearest Black Hardy Roses, Gloire de L'Exposition de Bruxelles, Black Prince, George Dickson, King George V and Prince de Camille Rohan. The five in one-year plants for 60c. The five in two-year plants for \$1.50.

Magna Charta

"A Genuine Treat for Everyone Who Plants It."

(Hardy June Blooming.) A wonderfully strong and upright grower, exceedingly vigorous, with splendid and heavy dark bronze-green foliage. The glory of the plant is in its flowers, however, as they are extraordinary in size, full and double, wonderfully fragrant, of great depth, and borne freely from the first year, on long stiff stems. Color, clear rosy-red, beautifully flushed with velvet-crimson. This Rose has proven hardy even in Canada, and a genuine treat is in store for everyone who plants it. A sure and profuse bloomer. The June Rose, Anna de Diesbach. A Rose of brilliant carmine, giving satisfaction everywhere. 15c and 30c.

Vick's Caprice (The Distinctly Striped Novel and Show Rose.)

(Hardy June Blooming.) This grand novelty is a true Hybrid Perpetual Rose. We esteem this one of its greatest advantages, as it may be grown to perfection by the amateur equally as well as by the professional florist. The flowers are large, ground color soft, satiny-pink, distinctly striped and dashed with carmine. It is beautiful in the bud form, being quite long and pointed, also showing the stripes and markings to great advantage, making a valuable and desirable article for cutting. 20c each; 3 for 50c; large 2-year plants, 40c each; 3 for \$1.00.

Madam Chas. Wood (Loaded With Flowers All Summer Long.)

(Hardy June Blooming.) A vigorous, healthy Rose, of dwarf, branching habit, and is simply loaded with flowers all summer long, being even more profuse than most of the tender "everblooming" Roses. The flowers are large, perfectly double, and of a dazzling scarlet-crimson color, and have the rich, spicy fragrance peculiar to the best Hybrid Roses. 15c each; 3 for 40c; large 2-year plants, 40c each; 3 for \$1.00.

Soleil d'Or (Orange-Yellow Rose)

(Hardy June Blooming.) The flowers of Soleil d'Or make up a wonderful combination of reddish-gold, orange-yellow, nasturtium-red, and opaline-pink. In a general way the color would be described as rich chrome-yellow, shaded coppery-rose. The expanded flower is perfectly double, the petals slightly incurved and fully expanded blooms measure 3 inches or more across; of vigorous growth, 3 to 4 feet high, branching well and bears quantities of exceptional highly colored flowers as its name implies, and when in full bloom is of striking brilliance. Extra strong 2-year plants, 60c; 3 for \$1.50.

The June Rose, Mad. Masson. The Rival American Beauty. Flowers pure crimson in color. Perfect in form and strongly fragrant. 1-yr., 20c; 2-yr., 40c.

Plants with strong vigorous roots and well branched tops. They are of a much larger size than the one-year plants, naturally a little higher priced. **THREE-YEAR SIZE**—These Roses are of a selected size, three-year-old, and will be sold from five and six-inch pots. They are heavy plants, well branched and offered as being the best Roses obtainable.

It is with a great deal of pleasure that we offer the following magnificent and beautiful English large flowering types, from the best known introducers. Among these newer varieties that are becoming very popular there are some that promise to revolutionize Geranium growing. In the different types will be found the most beautiful that can be imagined; magnificent in size, perfect in form and extremely gorgeous in coloring; some in splendid solid colors that fairly dazzle the eye, others in exquisite combinations of foliage and flower that baffle successful description, and bedding and pot plants, and wherever the very finest in Geraniums is desired. We feel confident they are all beyond the ordinary class of Geraniums in all points that go towards the making of the ideal plant and flower.

Buchner A new Geranium of the large flowering type and one that has proved to be a fine bedder. Flowers purest white; not a trace of coloring at center. Very free flowering, always a perfect mass of white. 10c
Plant dwarf and bushy. Each.....

S. A. Nutt This is the darkest and richest Geranium grown. It is a very bright, dark, deep rich velvety maroon, an excellent bedder and a perfect pot plant, one that must find its way into every collection. Stands the sun perfectly and is always a mass of bloom. Each, 10c

Mad. Jaulin Without question the finest new semi-double Geranium offered in many years. This is an entirely distinct color in the Bruant or bedding type; very large florets compose a truss of grand size; center of flower very delicate pink bordered with pure white. 15c

Wonderful
Pelargonium,
Gardener's Joy.

A Grand New American
Introduction.

The Wonderful Pelargonium GARDENER'S JOY

"As Showy as the Rhododendron."

This variety of Pelargonium is one of the latest introductions. The ground color is apple blossom-pink, the florets are from three to three and one-half inches in diameter, and are joined in enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half-dwarf nature, very sturdy and rapid grower. 25c each; 3 for 65c; 6 for \$1.20; \$2.25 per dozen.

New Pelargonium, German Glory

This plant novelty is quite remountant; the florets and clusters are very large. Ground color Cattleya-blue, very much like the Cattleya Orchid. The upper petals contain two large magenta distinctly veined. An exceedingly beautiful and exceptional new color in Pelargoniums. The plant is of very robust growth. A very desirable variety. 25c each; 3 for 65c; 6 for \$1.20; \$2.25 per dozen.

Ever-Blooming Pelargonium, Easter Greeting

("Rivals the Azalea in Beauty")—Easter Greeting is the most wonderful flowering variety of all Pelargoniums. Its blooming season extends from late winter to early fall, and through the summer the plants are gorgeous. The plants in five-inch pots have produced over a hundred trusses of blooms. The variety is of strong, compact, bushy habit, holding its foliage well. The color is hard to describe—a fiery amaranth-red. Some describe it as a brilliant rose. Each of the five petals being marked with a large dark brown or black spot in the center, the spot being bordered with scarlet daintily penciled with crimson. The florets are very large, from 2 1/4 to 3 1/4 inches in diameter, and are very durable either on the plant or when cut. 20c each.

Pansy Geranium

"Rivals the Pansy in Showiness of Flowers."

(Mrs. Loyal Pelargonium)—Mrs. Loyal Pansy Geranium (Pelargonium) bears flowers the markings of which are most extraordinary—also rivaling the Pansy in showiness of flower. The plant is of the easiest growth and is literally covered with flowers all the time. Nice plants, 20c each; 3 for 50c; \$1.75 per dozen.

Ivy Leaved Geraniums

"Especially Adapted for Hanging Baskets and Window Boxes."

The Ivy Leaved Geraniums make up a splendid class of climbing or trailing plants. They are especially attractive when allowed to hang from hanging baskets, and they are also especially adapted for window-box planting, baskets, vases, rock work, etc. They have thick, glossy, green ivy-like foliage, and bear remarkably large and double showy flowers, rivaling in beauty many of the finest double Zonal Geraniums.

P. Crozy Color soft, bright scarlet. 15c each; 3 for 40c; \$1.25 per dozen.

Achievement This is a grand new novelty from England, being a true cross between the Ivy and the Zonal class. It has the habit and texture of the Zonal with the form of Ivy foliage, and also of the Ivy bloom. The color is pure self rose with white eye, immense in size, on long stems, freely produced. 20c; 3 for 50c.

Florence Flowers are deep, bright pink. 15c each; 3 for 40c; \$1.25 per dozen.

Joan of Arc This is one of the most beautiful plants that it has been our privilege to offer. The flowers are perfectly double, white as snow, and literally cover the plant when in full bloom. The foliage is extremely handsome, the dense, glossy green leaves making a most effective background for the great cluster of snow-white flowers. 15c; 3 for 40c.

The center of the leaf is a deep green and the outer margin broadly marked with silvery-white. 20c each; 3 for 50c; 6 for 90c; \$1.75 per dozen.

Madame Salleroi

The Popular National Flower Fragrant Garden

CARNATIONS

When the people throughout the country were vainly seeking for an appropriate flower, acceptable to all, as our National Emblem, nature opportunely came to their assistance by presenting the improved Carnation—the product of American soil—which seems especially created for that purpose, uniting the red and white flower with foliage of metallic hue. While it is generally conceded that the Rose ranks first for producing flowers for cutting, the Carnation is gaining in popularity for its profusion of bloom, easy culture, and for the exquisite fragrance of its flowers. The last few years have seen an entirely new Carnation, forming one of the most beautiful and desirable flowers we have, flowering freely during the summer and fall in the garden, and with proper attention and care, giving an abundance of flowers indoors in the winter. We take pride in offering the following collection:

BEAUTIFUL DECORATIVE FERNS

These beautiful plants now occupy first place in the esteem of flower lovers. They are unsurpassed for decorative purposes; the fronds are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years.

Boston Fern

(*Nephrolepis Exaltata Bostoniensis*)—This popular Fern has proven a most valuable decorative plant. It is a rapid grower of very easy culture, soon forming a large, graceful plant; its beautiful fronds often attaining a length of five to six feet, which arch and droop gracefully. No plant ever introduced has had a larger sale than the popular "Boston Fern." It is still in large demand. You can make no mistake in ordering a "Boston Fern." Nice young plants, 15c each; larger plants, 25c and 50c each, postpaid.

EASY TO GROW.

IMMENSE FRONDS.

We offer well established plants at 20c each; 3 for 50c, postpaid; strong plants, 30c each; 3 for 80c, postpaid; extra strong plants, 50c each; 3 for \$1.25.

The Ideal Decorative Plant

The Roosevelt Fern

The Most Notable and Valuable Novelty Introduced in Many Years. Creates a Sensation and Wins Highest Prizes Wherever Exhibited.

Probably never in the history of horticulture has a plant been introduced that has received the universal admiration, praise and place that has been accorded the decorative Fern. The popular Boston Fern has had the most phenomenal sale of any decorative plant that has ever grown. The new variety, Roosevelt, is much more attractive than the Boston. The fronds grow very broad and heavy, often measuring six inches or more across, and five or six feet long. The plant assumes an exceedingly massive yet graceful appearance.

It is wonderfully valuable, not only on account of its beauty, but also on account of its ease in culture, hardiness and general adaptability. It has all the free-growing, hardy characteristics of the Boston Fern, and, like that plant, is equally suitable for house culture and a much more beautiful plant for greenhouse and conservatory decoration; in fact, it is a plant that appeals to everyone.

We offer well established plants at 15c each; 3 for 40c, postpaid; strong plants, 30c each; 3 for 80c, postpaid; larger plants, 50c each; 3 for \$1.25, postpaid. Specimen plants, 75c each; 3 for \$2.00. (The largest sizes of these Decorative Ferns should be sent by express.)

The Notable Roosevelt Fern, *Neph. Roosevelt*, 15c, 30c, 50c, 75c.

THE BEST ALL-ROUND PLANT GROWN

The Ostrich Plume Fern

WHITMANII

A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than the Boston Fern, which has had the most phenomenal sale of any decorative plant that has ever been grown, but which cannot be compared to the Ostrich Fern for beauty and general effectiveness. In decorative effect it far outdistances the original variety. It has taken gold medals wherever shown. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Gold Medal Fern in cultivation." Young plants, 15c; strong plants, 35c; extra strong plants, 50c.

The Grand New Dwarf Nephrolepis, "Teddy Junior"

(The Fern for every household)—This magnificent Fern is a sport from the now famous Roosevelt Fern, and while its habit of growth is to produce a shorter frond it retains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. It is such a compact, vigorous grower that it will thrive under most adverse conditions making an exceptionally rapid growth and producing a plant of rare beauty and perfection in the average dwelling house without special care or attention. Owing to its habit of producing the great quantity of massive foliage in small pots, this Fern makes the finest pedestal plant ever produced, and will prove indispensable for decorating dining room or library tables and numerous other places in the home where limited space will not permit using large pots or varieties with longer fronds. As a table-decoration, Fern growers can appreciate a dwarf variety that will produce forty to fifty fronds twelve to fifteen inches long in a four-inch pot. Young plants, 15c; strong plants, 25c; extra strong plants, 50c.

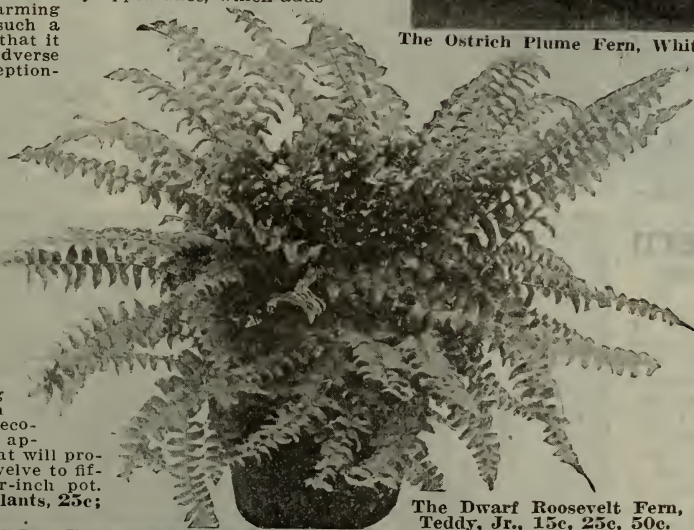

The Ostrich Plume Fern, Whitmanii, 15c, 35c, 50c.

The Newport Parlor Fern

(Nephrolepis Scotti)

—It is a condensed form of the Boston Fern with characteristics not evident in the parent, an average plant in an 8-inch pot having 200 fronds. The fronds average about twenty inches and three inches in width at the widest point, being more finished than the parent. Nice young plants, 20c each; medium size, 30c; larger plants, 50c.

The Dwarf Roosevelt Fern, Teddy, Jr., 15c, 25c, 50c.

SPECIAL OFFER—We will send postpaid one each of the Ferns on this page (not including the Hardy Fern), in the small size, four in all, for 50c. One each of the four Ferns on this page, in the medium size, for 95c. One each of the four Ferns in the largest size for \$1.65.

The Plumed Fern Scholzeli

The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae subdivided, giving it an airy, feathery appearance. Nicely shaped plants, 15c; larger sizes, 30c and 50c.

Hardy Ferns for Shady Places

These graceful and universally popular plants are of easy culture and afford a wide range of possibilities. A shady nook, where the soil is moist and the drainage good, will prove an ideal location, especially if a liberal amount of leaf mold or woods earth is available; and better still if rocks and stumps may unite in breaking the monotony of the ground's surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. 25c each; 3 for 70c; 6 for \$1.35; \$2.50 per dozen, by express only. (See page 87.)

Popular Porch and Basket Ferns

Lace Fern

One of the Most Popular Foliage Plants of the Century

(*Asparagus Plumosus*)—The family of *Asparagus* plants comprises a number of varieties. Some are climbers, some drooping or trailing, some erect and bushy. Many of them are highly prized for their beautiful and graceful foliage, and the two varieties which we list on this page are practically the most popular and valuable of all. The variety *Plumosus* (*Asparagus Plumosus Nanus*) is a tall climbing decorative plant and one of the rarest and of delicate beauty. Its bright green foliage is extremely fine and plume-like. The fronds grow from six to eight inches in width and when cut retain their color and shape for weeks. The plant may be grown as a pot plant, a bushy form or climbing. Florists grow the *Asparagus Plumosus* to give them rich green strings of foliage to be used similar to the popular *Smilax*. *Asparagus* possesses the advantage of being more graceful and its foliage finer than those of the most delicate Fern. As a house plant it will thrive under practically all conditions. The *Asparagus* likes a good rich soil and fairly warm temperature. The plant does best and carries the richest color of foliage when it is kept in a growing condition through a plentiful supply of nourishment. *Asparagus* is comparatively free from diseases, and with all its good qualities and practically no bad ones, it ranks as one of the first decorative plants to be had. Nice young strong growing plants, 15c each; 3 for 40c; \$1.50 per dozen. Larger plants, 25c; 3 for 60c; \$2.25 per dozen.

Feather Fern

Unsurpassed for Hanging Baskets

(*Asparagus Sprengerii*) — The *Asparagus Sprengerii* gives us a plant of the bushy and drooping form of the *Asparagus* family. The foliage is composed of dense glossy green, graceful and drooping branches. The Feather Fern or *Asparagus Sprengerii* is probably of a hardier nature than the *Plumosus*, and subjects itself to wider usage. It is especially valuable for window box and hanging basket planting, for vases and as specimens when grown in pots or as tub plants. The Feather Fern or *Asparagus Sprengerii* gives us a more valuable house plant, being one of easy culture, the sprays growing four to five feet long, and when the foliage is used for cut flower work it retains its freshness for an unusual length of time. The Feather Fern is particularly free from troublesome insects or diseases, and in this has one advantage over the large family of decorative Ferns of the Boston Fern type. The plants are of rapid growth, succeeding well in ordinary rich soil, and there is every reason to believe that all plant growers can have the greatest success with them. Price, nice strong growing young plants, 15 cents each; three for 40 cents; \$1.50 per dozen. Strong plants, 25 cents; 3 for 60 cents; \$2.25 per dozen. Larger plants, 50c each; 3 for \$1.25.

Norfolk Island Pine (Araucaria), \$1.25.

India Rubber Plant

(Ficus Elastica) — Ficus Elastica, better known all over the country as the Rubber Plant, is undoubtedly one of the most popular and satisfactory house plants that has ever been distributed. The plant is of tropical nature, being at its best under moist conditions and high temperature, but if well cared for, the foliage kept clean, good drainage provided, and the soil kept sufficiently moist, it will continue growing throughout the year. Branched plants are produced by simply cutting out the top, which should be done in the early spring. The Rubber Plant does not require more than what might be termed good garden soil. Its wonderfully thick leathery leaves enable it to stand excessive heat and dryness, while its deep, glossy green foliage always presents a showy appearance. It is particularly adapted to house culture and for porch decoration. Large plants by express, 50c.

Dracena Terminalis, 25c, 50c.

Norfolk Island Pine

(Araucaria Excelsa)—As a decorative plant for the house this is one of the handsomest and most serviceable. It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage is unequalled. Easily grown and highly ornamental. We offer fine selected stock, especially in the medium size, for which there is always demand. The plants withstand drought and neglect to an unusual extent. The soil in the pot from top to bottom should be kept evenly moist, but not continually soggy. During the heat of the summer, to keep up the proper growth, the plants should be kept in practically total shade and syringed constantly and not allowed to dry out for any great length of time. Nice large plants, 4 tiers, 15 to 20 inches high, \$1.25, by express only.

CHRYSANTHEMUMS

Large-Flowered, Hardy, Old-Fashioned

The Hardy Chrysanthemums are now universally planted in almost all gardens. They have no equal in the late fall either in solid beds or in mixed borders, as they give life and color to the garden after all other vegetation is destroyed by frost. They are of the very few flowering plants that improve after the first frost, and theirs are the only outside flowers during November.

Gorgeous Begonias for Shady Places

THEY WILL BLOOM ABUNDANTLY WHERE ALL OTHERS WOULD FAIL

Single and Double BEGONIAS, Tuberous Rooted

"The Ideal Plant for Shady Places—Nothing Can Surpass Their Brilliancy of Colors."

These are among the very handsomest of our summer-blooming plants, flowering throughout the season in any nook or corner in complete shade. Nothing can exceed the brilliancy of their colors, the delicacy of their tints, the richness of their waxy flowers, the gorgeousness of their effect in masses, or their graceful appearance in beds or borders. From the time the first blossom appears until all growth is stopped by frost, they are never out of bloom; great waxy flowers from three to five inches across. On the approach of cold weather they should be taken up, and the bulbs stored away in a warm place until the spring, when they may be started in pots before planting in the garden. We offer double and single flowering bulbs in five colors; white, orange, pink, yellow and crimson. 15c each; 2 for 25c; 6 for 75c; \$1.35 per dozen.

Crested Tuberous Begonias

The Crested Tuberous Begonias make up a gorgeous and unique class having the attractiveness of a single or semi-double flower, but the inner petals of the flower are overlaid with petals which are densely fringed and frilled. The plants of this strain are of good bushy habit and produce a continuous display of color unapproached for richness and intensity. We offer in the Crested type separate colors of crimson, yellow, white and pink. 15c each; 3 for 40c; \$1.50 per dozen.

Begonia Speculata

Quite a novelty in the Rex type. Leaves bright green, with a background of chocolate; spotted with silver. High, spray-like pink blooms. 15c each; 3 for 40c.

Mammoth Leaved Rex Begonias

"The Most Decorative of the Begonia Family."

The Rex division of the Begonia family has been a great favorite. In no other class of plants do we find the rich metallic foliage, lustre and various colors so satisfactorily blended as here. We find colors of bright green, silver colored, reddish bronze, as well as varieties of bright rosy plum color. The plants are grown exclusively for the great beauty of their foliage, as they make unexcelled pot plants or bedding plants when they can be planted out of doors in shaded situations. For rockeries they are unexcelled and they grow luxuriantly along foundations where shaded, and where the Tuberous Rooted Flowering Begonias in all their wonderful shades of color do so well. The Rex Begonia dislikes our dry atmosphere and bright sunshine, and thrives best in a rather shady and moist situation. The soil should be as near as possible of the nature of a mixture of loam, sharp sand, and well rotted cow manure. The soil should be light and porous. Price of Rex Begonia, good, strong established plants, 20c each; 3 different varieties for 50c; \$1.75 per dozen.

Double and Single Sweet Scented

VIOLETS

The Violet gives us the most popular and important flower in culture, for it ranks third in commercial importance; the Rose first, Carnation second and Violet third. This comparison is reckoned commercially by the length of the blooming season, which is rated as ten, eight and seven months. A crop worth millions of dollars is raised annually from the Violet through private and commercial work, and Violet culture is now receiving unusual attention. It is a beautiful flower, popular with all, and of easy culture, doing well in any good rich soil.

McGregor's Fancy Bedding Coleus

The Coleus, a plant very familiar to all, is one which, for bedding purposes, cannot be excelled. The foliage is very beautiful in many of the good newer sorts, and shows a great variety of markings and fine combinations. Being easily propagated from seed or from cuttings, it is used in great quantities in private places, in small gardens and in the public gardens and parks. The Coleus is used to best advantage in planting in ribbons of color in the borders along drives, in beds of various shapes, such as stars, crescents, triangles, circles and squares, as the foliage, being of such various colors, can be used with striking effect. Light colors against dark, with borders of contrasting color; which are easily obtained among the yellow, red, striped, mottled, brown, blue-black, plum and other colored sorts, secure effects when used on a fine lawn or in the border, hard to make with other plants.

The Coleus thrives best in a rich, sandy soil, composed of two-thirds good field soil and balance equal parts of sand and manure. In selecting a location for Coleus beds, avoid shady places, for when planted in the shade, the colors will not be brought out so beautifully as when out in the full sun. Plant four to eight inches apart.

Price for any of the following named varieties (except where noted), 7 cents each; 3 for 20 cents; 5 for 30 cents; 25 for \$1.35; 100 for \$5.00. (Purchaser may select one or more varieties.)

Summer Flowering Callas

PLANTING INSTRUCTIONS—The varieties offered below succeed best when treated in same manner as Gladiolus, Tuberoses and other summer-flowering bulbs. They should be planted in the open border in a dormant condition when danger from frost is over in spring, and will then flower during the summer months. When the tops are killed by frost in the autumn dig and store through the winter as you would potatoes. Callas do equally well in pots. Supply drainage, fill base pot with well rotted manure and fairly light soil. When bulbs have been well started into growth give them a good mulch.

White Calla

(New Godfrey)—A wonderful improvement over the old White Calla. The plant is very bushy, having double as many leaves as the old variety, and producing three times as many flowers. Flowers are unusually large, held high, and on stiff stems. After the summer growing season, the bulbs can be taken up in September, given a slight rest, and will flower through the winter. The same plant will grow and bloom for years and the quantity of flowers this variety will produce is astonishing. It is estimated that several plants of the old variety will not produce as many blooms in a single season as this more recent introduction. The blooms are of large size and of snowy whiteness. 20c each; 3 for 50c; 6 for \$1.00. Large bulbs, 40c each; 3 for \$1.00.

The Yellow Calla Hastata, 25c. Blooms both in and out of doors, beautiful lemon-yellow flowers.

The White Godfrey Calla, 20c. Wonderful improvement over the old White Calla; bloom of snowy whiteness.

Yellow Calla

(Calla Hastata)—The flowers are clear lemon-yellow, produced freely on long stems. The foliage is deep rich green, and the plant is quite showy. It does well planted outside, strong growing and blooming freely. This new variety is a genuine Calla and is cultivated the same as the Common White Calla. It has the habit of the more dwarf sorts by blooming when quite small. Treated as a summer flowering bulb it will bloom as well outdoors as within. 25c each; 2 for 40c; \$2.25 per dozen.

Grand Improved Yellow Calla Elliottiana, 35 cents.

The planting of shrubs is an important feature in the adornment of any grounds. They may be planted individually or collectively, and but few of them are really required to add to the beauty and value of property, and at the same time contribute to the pleasure and interest of the home. Probably the most effective arrangement of shrubs is irregular groups or arranged against buildings, fences or property lines or as planting along walks or drives. Our collection is a practical one and the plants we offer healthy and vigorous.

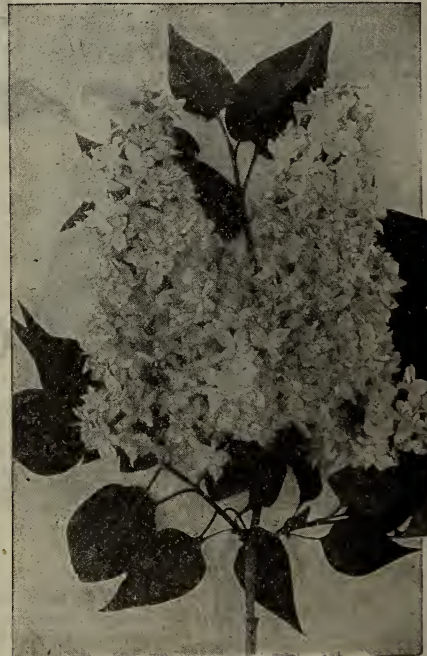

In the past the offers of shrubs by mail, postpaid, has necessitated sending reduced size plants, and inasmuch as we can send much heavier plants when forwarded by express, at no increased cost in the price of the plants, we have decided to offer shrubs by express only, which will give our customers plants with practically a year's advance in growth.

Hydrangea Arborescens

Grandiflora Alba (Hills of Snow)—(Four to eight feet.) This beautiful hardy American shrub is the finest addition to this class of plants found in many years. The blooms are very large, of pure snow-white color, resembling a little the hardy shrub so well known, the Snowball, in color and make-up, only they are much larger in size and much more striking. One of its most valuable features is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early in June through August, renders it a valuable plant not only to the florist, but to the owner of every garden. It is perfectly hardy, standing twenty degrees below zero. By express, 15c each; 3 for 40c; \$1.50 per dozen. Strong plants, 25c each; 3 for 60c; \$2.40 per dozen. Strong field-grown plants, two and three years old, 50c and \$1.00 each, by express only. Plants at 50c each, \$5.00 per dozen. Plants at \$1.00 each, \$10.00 per dozen.

Rhododendrons

(Grows 2 to 4 feet, flowers in late spring.) Universally acknowledged to be most showy, magnificent hardy evergreen shrub that grows. A protection of leaves and brush during the first winter will be beneficial. We offer three colors, Red, White and Purple. Price, \$1.25 each, by express only.

Hardy Hydrangea

This is the finest flowering shrub for cemetery planting we know of. See illustration. By express, 15c each; 2 for 25c; \$1.40 per dozen; large plants, 25c; 3 for 60c; \$2.40 per dozen; large field-grown plants, 50c each; 3 for \$1.15; \$3.75 per dozen.

THE SENSATIONAL DECIDUOUS SHRUB,
BUDDLEYA VARIABILIS MAGNIFICA

THE EVER-BLOOMING Butterfly Bush

(Summer Lilac)—Free flowering. Blooms all summer. The Buddleya or Everblooming Butterfly Bush was one of the show plants of the San Francisco and San Diego expositions. It attracted unusual attention and was greatly admired by thousands. The Buddleya is a deciduous bush dying down in the winter. In the spring the top should be cut off quite close to the ground. The blooms come from the new wood produced through the summer. Buddleya is one of the most valuable plants either for border or specimen planting, blooming as it does late in the season, and continuing in bloom from the latter part of June until nipped by frost.

It is very rapid growing, and two years will make a large spreading bush, four to six feet high. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. We recommend covering the roots with manure, leaves or other suitable material as winter approaches.

One-yr. plants, by express, 20c ea.; 3 for 50c; \$1.75 per doz.; strong 3-year heavy plants, 30c each; 3 for \$1.25; \$4.50 per doz.

G40 Cases
from One Acre.

Prices on Nursery Stock are placed low and we cannot allow premiums on orders for Fruits or Fruit Trees.

The trees offered are young and thrifty and will make a very rapid growth and bear quickly. When fruit trees or shrubs are received, before they can be planted they may be safely kept a reasonable length of time by having the roots packed in boxes of moist soil and stored in a cool cellar or shed. It is important to order fruits early, that they may be planted out before the foliage starts.

When offered by mail, postage is paid by us; if by express or freight, charges are to be paid by purchaser; but larger stock will be sent.

SPECIAL NOTICE—As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all nursery stock be shipped direct from the Nursery.

The fruit stems are large and strong and the dark green foliage is an ample protection for the blossoms and fruit. It is a perfect blooming variety. The fruit is large and regular shape and continues large to the end of the season. In color it is a rich red all over, the meat also being red.

Taken altogether, the Gibson is an ideal variety of a size, shape and color capable of commanding the highest price in any market and of a sturdiness able to withstand the drawbacks peculiar to every section. 55c per dozen, postpaid; \$1.10 per 100; \$8.25 per 1,000, by express.

Aster

Fort Wayne, Ind., April 15, 1916.

Gentlemen:—I want \$1.00 worth of Aster Seed.
Last year I got the four kinds on your color-plate
and sold over \$25.00 worth of flowers from the
plants grown from those four packets of seed.
There were none nicer on the market.

Yours faithfully,
MRS. BERTHA GRISWOLD.

McGregor's Selected Flower Seeds

We have used the greatest care in obtaining our Flower Seed, and those we offer are absolutely fresh, being grown by most skilled American growers or imported from the best foreign seed growers. Failure in getting satisfactory results from seeds planted may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

Straw flowers are growing in popularity and are no longer seen only in old fashioned gardens, but in the gardens of those who are fastidious in taste and want only the best. The new varieties present a range of colors unrivaled in brilliancy and gorgeousness. The seed should be planted in rich garden soil and plants allowed plenty of room. The blooms should be cut freely and not allowed to go to seed. They develop more beautifully either when used as a fresh bouquet or for a dried bouquet if cut just as the buds are unfolding. They retain all their silkiness of petals, globe shape and exceeding brilliancy of color for many months when dried. These new varieties produce flowers from one and one-half to two inches across.

Asters—Four of the Finest American Asters

Asters are now rivalling Chrysanthemums in form and color, and almost in size. Nothing is more artistic than the fluffy, graceful Asters on long stems, of exquisite delicate or brilliant colors. The varieties we offer are specimens of various types.

New Aster "Enchantress"

(OR AMERICA.)

This is the same exquisite shade of light pink as the much admired "America" Gladiolus and the "Enchantress" Carnation. It is a midseason variety, and the form of flower while loose, is compact, on long stems. 15c per pkt.

New Red Aster "Sensation"

This is the reddest of all red Asters, the color being a rich garnet or oxblood-red. The plants are of free-branching habit, about 18 inches high; the very double, immense flowers are borne freely on stems a foot long from early in August until the close of September. 15c per packet.

Crego's Giant White Aster

They are of American origin, of free sturdy growth, attaining a height of over two feet, well branched, with long strong stems and artistic, fluffy flowers, rarely less than four inches across and frequently over five inches. Purest glistening white. 15c per packet.

Crego's Giant Lavender Aster

An exquisite shade of bright lavender. Long curled petals, an immense flower, as fine as any Chrysanthemum, and when cut keep longer in good condition than any other Aster of this type. They bloom from mid-August on through September. 15c per packet.

Special Offer

Four packets of Finest American Asters for 50c; one each of Enchantress, Sensation, Crego's White and Crego's Lavender.

Nasturtiums, Novel, Giant Flowered, Tall Varieties

Nasturtiums are now not only grown for their brilliant rich mottled foliage as the variegated leaved Nasturtiums. A new class is now introduced with small, almost black, notched leaves like English Ivy. All kinds planted together produce a striking effect.

NASTURTIVM, TALL VARIEGATED LEAVED, MIXED—Leaves beautifully variegated with yellow, white and green and flowers of various colors, orange, yellow, scarlet, crimson, mottled, etc. Both flowers and foliage attractive and charming; by some called the "Royal Nasturtiums." A great novelty. 10c per packet.

NASTURTIVM SALMON QUEEN—Bright green foliage, showy flowers of a rich, but soft velvety shade of salmon. 10c per packet.

NASTURTIVM MIDNIGHT—Plants of extremely dark green foliage. The flowers are a deep brownish-red or crimson, shaded darker. Petals like crumpled velvet. 10c per packet.

NASTURTIVM IVY-LEAVED MIXED—Foliage ivy leaf shape, of intense dark green. The magnificent, large notched flowers of all shades of yellow, many with sharply-marked blotch of velvety red-brown, are extremely effective above the rich, dark foliage. 10c per pkt.

Special Offer

Four packets of Novel, Giant-flowered Tall Nasturtiums for 30c; one each of Variegated Leaved, Salmon Queen, Midnight and Ivy-Leaved for 30c.

Centaureas, Royal Sweet Sultans

The new varieties of Royal Sweet Sultans are now extensively cultivated by florists to sell as cut flowers in the larger cities. The cut blooms keep a long while in water, have long slender stems, are delightfully fragrant, and exquisitely delicate in color.

CENTUREA WHITE—Pure white, feathery. 10c per pkt.

CENTUREA ROSE—A wonderful new color of bright exquisite pink. 10c per packet.

CENTUREA YELLOW—Lovely bright yellow and very fragrant. Much admired. 10c per packet.

CENTUREA PURPLE—Various shades of bright lavender and purple, very popular. 10c per packet.
